Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by de Chevron Villette et al '113.

See cradle 14, drum 8', "steeply" inclined surface 9'a, "slightly" inclined surface, remainder of 8', and feed guide, hole in 14. In column 3, lines 51-53, the conical face 9'a directs the cord 11 as it arrives on the drum 8'. This clearly anticipates the recitation that the cord is directed "onto said steeply inclined portion". The term "onto" is broad and indicates merely that some contact is made between the steeply inclined portion and the cord. The disclosure in '113 that the surface 9'a "directs" the cord as it arrives on drum 8' indicates that such contact is also made.

Claims 1,3 and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fun.

See cradle 30, drum 40, "steeply" inclined surface 434, "slightly" inclined surface 431, and feed guide 351. See also the discussion in column 2, lines 35-39.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fun.

Inclined surface 434 defines a shallow angle of inclination. Whether it is 10 degrees is not known. However, it gives such an appearance and further modification to achieve the 10 degree angle would have been obvious so to properly promote movement of the cord down the surface.

Regarding the spacing between the guide surfaces, it would have been obvious to enlarge hole 351 so as to reduce wear on the cord. The axial dimension of inclined surface 434 is such that it would accept the cord on a surface spanning the equivalent of two cord diameters.

Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fun in view of Anderson et al '503.

'503 discloses a curved guide surface for feed aperture 519. It would have been obvious to modify Fun to have such a curved aperture so as to reduce wear on the cord. The spacing between guide surfaces and the angle of the steeply inclined portion are addressed here as above.

Allowable Subject Matter

Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 12 is allowed.

Art Unit: 3634

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blair M. Johnson whose telephone number is (703) 308-0526. The examiner can normally be reached on Mon.-Fri., 6:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on (703) 308-2486. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
